"Contraband" skins separately numbered		375	
		36458	

I started in Papua with #35600 as I had neglected to note the last number of the birds shipped from Samarai sometime in early November. It is about right, I think. Since the govt approved only ten of each unprotected species I took considerably over that and tried to keep the extra ones separate both in labelling & packing. It took too much time and I made mistakes - but the

government does not mind in the least. The customs officer only glanced at the skin I had laid out for inspection. ~~I am retaining one box for shipment when we return to the Solomons; one large case & one smaller one are all that are shipped with the museum specimens. ~~and~~ one case of material in solution - 2 benzine tins. shipped about Dec 10<sup>th</sup> from Samarai~~

One large case shipped on Jan 21<sup>st</sup> containing all birds taken up to the present

Note - all labels marked by the Captain & boys during my absence were marked exactly wrong - the signs confused throughout -
